

ANDROLOGY AUSTRALIA GP SUMMARY GUIDES

A series of GP Summary Guides on the management of male sexual and reproductive health have been developed to assist GPs in the management of their male patients.

The complete series of the guides are listed below.

NUMBER	GP SUMMARY GUIDES
1	Male genital examination: Step-by-step Examination of male genitals and secondary sexual characteristics
2	Childhood and Adolescence Examination of male genitals and secondary sexual characteristics
3	Adulthood Examination of male genitals and secondary sexual characteristics
4	Androgen Deficiency (AD) Diagnosis and Management
5	Male Infertility Diagnosis and Management
6	Testicular Cancer Diagnosis and Management
6.1	Testicular Cancer Supplemental: Classification and Treatment
7	Prostate Disease (BPH & Prostatitis) Diagnosis and Management
8	Premature Ejaculation and Other Ejaculatory Disorders Diagnosis and Management
9	Erectile Dysfunction Diagnosis and Management
10	Klinefelter's Syndrome Diagnosis and Management
11	Engaging Men In Primary Care Settings

This project is an initiative of Andrology Australia. Andrology Australia is funded by the Australian Government

Department of Health and Ageing. The authors have made reasonable effort to ensure that information presented in this guide was current at the time of production.

GP Summary Guides 1- 10 – these guides are an initiative of Andrology Australia and coordinated by the Department of General Practice, Monash University. These Summary Guides were developed by staff at Andrology Australia and the Department of General Practice in consultation with national specialist and GP reference groups.

GP Summary Guide 11 – this guide was developed by staff at Andrology Australia in consultation with national specialists and a GP reference groups.
